
The evaluation target: in sample against a target the model has not seen
synthetic arm
W1, against its own target
W1, in sample
synthetic arm
W1, against its own target
W1, in sample
empirical arm
W1, cross-validated
W1, in sample
uniform weighting
log(KDE / lognormal),
below zero = the KDE is closer
synthetic, against its own target
empirical, cross-validated
EPDs in the dataset
Normal, uniform weights
Normal, market weights
Lognormal, uniform weights
Lognormal, market weights
KDE, uniform weights
KDE, market weights
