

Each synthetic dataset is drawn from a known mixture of one to five modes

shaded: each mode, scaled by its share of the values; black: the mixture parent; ticks: the values drawn

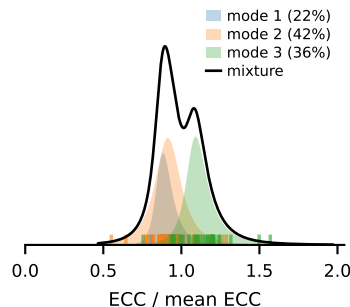

(a) 1 mode, 23 values,
overlap 0.00, CV 1.11

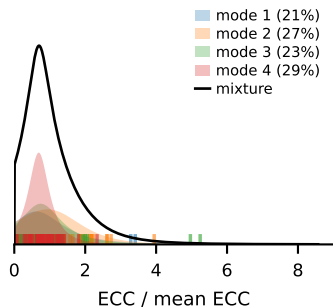

(b) 2 modes, 39 values,
overlap 0.71, CV 0.85

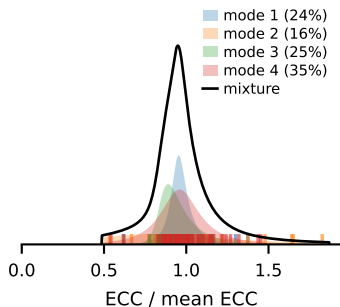

(c) 3 modes, 86 values,
overlap 0.31, CV 0.17

(d) 4 modes, 150 values,
overlap 0.68, CV 0.97

(e) 4 modes, 123 values,
overlap 0.40, CV 0.20

(f) 5 modes, 386 values,
overlap 0.41, CV 0.91
