

Switching family by dataset size is the best available choice on 10 of 15 claims

 best a reader can choose
 best of all seven
 within noise of its row's box (95% interval)

(a) How far each policy is from the truth

(b) Switching cost

what a reader can choose

what market shares would buy

median

what is the building total?

the total: its standard deviation	24.2	28.0	34.3	23.7
the total: its mean	9.8	9.9	13.5	9.6
the total: its 90th percentile	13.0	13.2	13.3	12.7
the chance of meeting a budget	6.2	5.5	10.1	5.2

24.4	29.4	35.0
10.0	9.4	14.2
12.6	12.7	13.4
6.3	5.3	9.6

which material is biggest, and how often?

a material: its chance of being largest	33.5	32.4	48.8	32.6
a material: its share at the building 95th	29.5	27.5	28.3	27.2
a material: its standard deviation	30.8	32.8	36.0	30.7
a material: its share of the total	12.9	12.4	16.3	12.5
a material: its 95th percentile	24.0	23.3	24.1	22.6
a material: its mean contribution	16.1	15.5	20.9	15.6

33.3	33.7	50.5
27.5	26.0	26.7
29.5	33.6	36.4
12.5	12.2	16.7
21.9	21.5	22.4
14.8	13.8	21.2

which material drives the uncertainty?

the uncertainty index	49.1	49.8	48.6	48.8
-----------------------	------	------	------	------

47.6	49.6	47.7
------	------	------

how effective is a reduction strategy?

a cap: how often it binds	32.5	32.9	57.4	31.8
a cap: its chance of saving 5%	34.5	34.7	61.1	33.6
a cap: its mean saving	40.1	39.9	55.2	39.6

31.1	33.3	58.4
32.5	34.3	61.3
37.2	37.0	56.5

is this design better than that one?

the probability B beats A	13.6	13.2	19.4	13.3
---------------------------	------	------	------	------

12.6	13.4	19.6
------	------	------
